Installation:

IMPORTANT: Always turn power off to the circuit via the breaker box powering this mirror during installation and maintenance. Professional installation recommended.

1. Unpack the boxes, identify and verify all contents prior to installation.
2. Confirm proper mirror orientation.
3. Decide mirror placement on wall.
4. Prepare and install wall hung slot.
5. Match and connect 3 electrical wires from the mirror to the home electrical wires.
6. Hang and affix mirror to the wall.

Cleaning & Maintenance:

- Turn off the light before cleaning.
- It is recommended that the unit is cleaned with a soft, dry, non-abrasive cloth.
- Never use cleaning agents or abrasive material on any type of surface finish.
